Administrator Login

Quick Start Guide · https://ivolunteer.com/support-docs/administrator-login/

When you first signed up for ivolunteer.com, you were emailed a link to your organization home page that looks like this: http://myorganization.ivolunteer.com. The top right-hand corner of this page contains a link titled **Administration.** You can follow this link to the secure login. Use the email address and password you created during the checkout process to log in.
Another way to get to the administration page is to add “admin” to the end of your link. E.g. https://myorganization.ivolunteer.com/admin.

Note: Access to the Administrative pages is over a secure connection (https) to keep your login and organization information safe.

After successfully logging in, you should be at the Administrator **Dashboard** menu. The Dashboard menu provides you with useful information about your events, status of your subscription, and a listing of all the most recent activity associated with your organization.
