Organization Default Settings vs. Event Settings

Editing Your Organization Details · https://ivolunteer.com/support-docs/organization-default-settings-vs-event-settings/

Your organization's **New Event Defaults** apply to any new events that are created (except the **Colors** and **Tracking** settings, which apply to all new and existing events). It is therefore advisable to customize these in the beginning so that they can apply to any events you create.

Event-level settings are unique to each event. When a new event is created, a copy of your organization's **New Event Defaults** becomes part of the new event. When an event is copied, the event settings are copied from the event being copied. Modifying event-level settings will NOT affect settings with any other event or the New Event Defaults.

Note: You can use the **Revert** button to revert New Event Defaults back to the System Default Settings. If you click **Revert**, any custom changes you made to your New Event Defaults will be lost.
