The Admin Dashboard

ivolunteer.com Administration Guide · https://ivolunteer.com/support-docs/the-admin-dashboard/

The **Dashboard** admin page shows the status of your events and your ivolunteer.com subscription at a glance. This page is **automatically updated every 30 seconds with the latest information about your events.**

The Dashboard page is divided into four sections:

- **Announcements** - This section (when shown) will inform you about new features, service availability, tips and other ivolunteer.com related announcements.
- **Account Status** - Gives a quick view of the number of participants and administrators and the status of your subscription. Anything in red may require your attention. This section also provides links to your Home Pages and the Activity Log, which shows account activity such as administrator logins, slot confirmations and cancellations, and emails sent.
- **Active Events** - This shows you all of the events you currently have active and includes an up-to-date count of how many slots remain open.
